Pennsylvania Tourists Return From the Land of Flowers.

WHITE - WINGED TOURIST

The Ladies Are Becoming Onite Spoony and Will Make a Raid on the Jewelry Stores.

A solid train of eight coaches, being the Pennsylvania's first tour to the Pacific coast, arrived in this city at 7:30 last even ing. The party is in charge of Mr. Colin Studd and Mrs. H. F. Bender, who fills the responsible yet unique position of

Mrs. Bender is the only woman in the employ of a railway company in that capacity in the United States and by her many kindly attentions and cheerful look converts the tedium of travel into a round of pleasure.

When seen by a HERALD reperter at the Templeton as late as 11 o'clock last even ing she was bright as a silver dollar fresh

from the mint and quite above par.

"You must be weary after much travel

with the cares of 150 tourists on your hands," queried the reporter of the bright little lady.

"I never feel tired, too busy thinking of the comfort of others to think of that; only those that think of themselves grow weary," said the white-winged chaperon imparting agem of philosophy that is worth keeping and cultivating in this tired and fagged out world.

"We left New York on February 7, with a party of 117," said Mrs. Bender, "being the Pennsylvania railway's first tour to the Pacific coast. We have tours to Niagara, Watkin's Glen, Old point Comfort, Luray caverns, Natural bridge, and other Virginia points, and winter tours to Florids. Our train is considered the finest that ever crossed the continent. It consists of two dining cara, a handsomely appointed smoker, one end of which centains a bath room and barber shop. Following this comes four of Pullman's best sleepers, while the rear is brought up in great shape by the most attractive coach on the train, the observation car. This is supplied with a piano, a well selected library and writing desks. Here sits the stenographer and typewriter to dot down messages of business and affection.

while a colored main is ever ready to the bidding of the ladies.

"We made our first stop at New Orleans and indulged in Mardi Gras festivities for two days. Historic and interesting old San Antonio came next. After that the party had a drive from El Paso over into Juarez, Mex., where a raid was made on the opal

mmittee of ladies and gentlemen sent A committee of ladies and gentlemen sent out by the Les Angeles chamber of commerce came 400 miles over the plains to greet us and the welcome was a royal one. Fruits, flowers and California's royal beverage were lavished upon us. Our dining cars were transformed into bowers of roses while each lady had a corsage bouquet and each gentleman a bouttonier. We made our first stop in the state at Les Angeles, the attractions of which were shown us by the chamber of commerce. From here we and each gentleman a bouttonier. We made our first stop in the state at Los Angeles, the attractions of which were shown us by the chamber of commerce. From here we went to the southern part of the state and for a week enjoyed life at the palatial hotel Del Coronado, which by the way, I believe is the largest hotel in this country. Owing to the washouts we were unable to get away from San Diego by train, hence had the delightful experience of a night on the Pacific, and worthy its mame the great pond proved to be. San Pedro was reached after a twelve hour ride on the steamer and by creeping over roads with sand bags for balinst we arrived in Los Angeles and immediately wended our way to one of California's most glorious inns, hotel immediately wended our way to one of California's most glorious inns, hotel Raymond, of Pasadona.

En route from Los Angeles to San Francisco a glee club was organized and was named 'Chinook,' after one of the Pullmans. The club is made up of Mr. and Mrs. Craft, Mrs. Champlin, Mr. Rowley, Mr. Hatt, Miss. Lloyd, Miss Cushing, Mr. and Mrs. Simpson, Mr. Studds and Mrs. Bender. Whenever the glee club finds the occupants of any particular car tired or drowsy, they dispel their reveries by some of their choicest selections.

"The efforts of Messrs. Cassell, Butterfield and Stewart to excel in California yarns were appreciated by the tourists to the extent of presenting each of these gentlemen with a tiny hatchet, which they are to keep in view during the remainder of the trip." THE HERALD.....

TWO PLUCKY YOUNG AMERICANS

"Honor of the Uniform" Protected in Germany and Austria by the Silcing of Offenders.

MERICAN tourists traveling in Europe will do well in future to avoid the society of military officers on the continent. For, according to the recent decisions of the German and Austrian courts, an officer is permitted to draw his sword and to cut down any person who in his hearing speaks

disrespectfully of the imperial or royal family or of the imperial or royal uniform. Moreover, he is not only authorized, but even obliged to use his saber without hesitation or remorse if he believes himself to be in danger of being insulted or struck by a person whom he supposes to be his infe rior in rank, and as such debarred from giving him satisfaction for the offense in a duel. Now continental officers are pro-verbially sensitive on the score of their sovereign and of their profession. They are apt to regard the slightest piece of independent and straightforward criticism in the light of an insult, and before the American traveler is aware he may find his remarks cut short by a sudden blow, not with the flat but with the keen edge of the sword, across the head or the shoul-

As an illustration of the readiness with which European officers draw their sabers on unarmed civilians, I may cite an incident of this nature which took place at Klagenfurt, an important town of Austria, last autumn, and which has recently been engaging the attention of the author ities at Vienna. A number of officers be-longing to an infantry regiment that formed part of the garrison were listening to the music of a military band in the beautiful public garden of the locality, when suddenly a dispute, followed by a scuffle, took place between two men near the entrance. One of the officers, who happened to be passing by at the time, inquired what had occurred of a gentieman stand-ing beside him, looking on. The question was put in tones so gruff and so offensive that the civilian to whom it was addressed declined to make any reply. His silence enraged the officer to such an extent that he made use of an insulting epithet, which was immediately returned in kind.

The officer thereupon boxed the ears of the civilian, who responded with his fist on the nose of the lieutenant. The latter at once drew his sword and cut down the civilian with a blow across the shoulder, and before the prostrate man could recover his footing he found himself assailed with drawn sabers by a number of the lieuten-

The affair naturally created intense indignation among the town people who had witnessed the scene, and one of them, a wealthy young mine owner of the neighborhood, was ineautious enough to express in a somewhat loud tone of voice his opinion that an attack by seven armed men on a single unarmed civilian was nothing more nor less than a disgraceful "It is a violation of the building ordin-ance and the man who put it up ought to be standing near by heard him, and inquired if he really meant what he said. Nor should I omit the case of Count Grotta von Grottenegg, a chamberlain of the Emperor Francis Joseph and captain for having bewn down with his saber on the staircase of his belle amie's house his ring he began:

I came here from Buffalo to find work him in the dark. The count did not deny having dangerously wounded the prosecu-tor, but claimed that he was obliged to

draw his sword in order "to preserve intact the honor of his uniform." The excuse was regarded as perfectly adequate and valid by the judges of the criminal court intrusted with the hearing of the case, and the count was acquitted. Nor were the officers implicated in the affrays at Klegenfurt and at Erlau in any way molested by the authorities, who held that they had been entirely justified in using their sabers on unarmed and defenseless

civilians.

In order to fully appreciate the position of the officers in the matter, I should state that if any one of them, while in uniform, is either struck or insulted without aveng ing the affront he is dismissed the army in disgrace, and not only expelled from all the clubs and warned off the race courses, but also ostracised by society in such a manner as to render his expatriation indis-pensable. While it is always possible to avenge, by means of a duel, an insult on the part of an equal or of a superior, officers

The result is that continental officers, unlike those of the British army, are rarely if ever seen in uniform without their swords. My attention was called to this peculiarity during a visit which I paid to A Giance at Ewing's Stable—The Necessity Vadowitz, in Galicia, some ten years ago. I was just stepping out of the sleigh, in which I had been spinning along over the

The man was just intoxicated enough to The man was just intoxicated enough to be disposed to be ugly, and was daring the prince to "come on," when suddenly the house door flew open and the princess, a delicate, frail looking little woman, rushed out, holding a drawn saber, which she thrust in her husband's hand. She had noticed that he had neglected to buckle on his sword when he started out for the drive, and now hastened to repair the neglect. The sight of the saber appeared to have a kind of sobering effect upon the peasant, who, without saying another word, whipped up his horses and vanished round the corner at breakneck speed. As soon as we got into the house the prince kissed his wife's small hand in a most affectionate manner, and thanked her warmly for her wife's small hand in a most affectionate manner, and thanked her warmly for her 'presence of mind" in bringing him his

On another occasion, during the grand maneuvers of the Prussian army, I had just finished luncheon with a lieutenant of dragoons when his orderly announced that a little batch of about a dozen young privates, who had misbehaved themselves was outside the door awaiting his instructions with regard to their punishment.

The lieutenant strolled out into the street in front of the house to the spot where the men stood, without taking the trouble to either button up his coat or to buckle on his sword.

SOME OF BROWN'S BEAUTIES

I trotted in to Arthur Brown's stable and took a good look at his King Blucher. Indeed, he is a king, and well named Blucher. He is a bright bay, sixteen hands high, and is as perfect as though he had been been turned out of a lathe. My readers will see him this summer, when the mile track will have been built. Great honor to Martin & Drake, of Provo, for importing this grand horse. Blessed is Arthur Brown in possessing the same, and lucky is Sait Lake to have him here. He was sired by Swigart, he by Belfunnder, dam, Blucher etta, with many other sires and grand-sires of trotters. Swigart, the sire, is the sire of twenty-two trotters in the 2:20 down to the 2:18 list. The next of Mr. Brown's is Suffolk Punch, a grand horse, also imported by Martin & Drake. This horse will prove a great advantage to Utah.
